

EMERGENCY BACK-UP PUMPS

Model 441 12 Volt Emergency Sump Pump System

Automatically works during power outage or main pump failure.

Features:

- Advanced 5-stage charging system outperforms “trickle” type chargers
- Audible alarm and light advises of emergency pump operation
- Works with marine-type deep cycle batteries*
- Automatically recharges battery after use

* Battery not included

Model SJ10 SumpJet® Water Powered Back-Up Sump Pump System

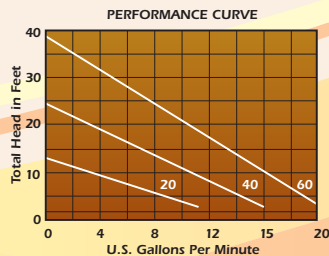

Features:

- Works off municipal water supply*
- Accepts 20PSI up to 100PSI inlet supply pressure**
- Fully automatic
- High-output flow rates
- Compact design
- Fully-assembled
- 1-1/2" Discharge
- 3/4" NPT water inlet connection (optional hose connector included)
- UPC approved

Efficient design removes more water per gallon used

* The SJ10 requires an uninterrupted water source to operate. If you have a well pump, the SJ10 will not operate during power outages

**SJ10 pumping performance varies with inlet water source pressure and pumping head. See complete specifications and performance chart for expected flow rates.
